

Converting a PDF to Word document

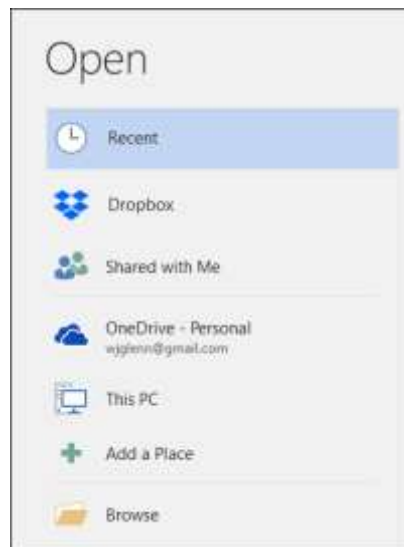

1. Click "File" on the Word ribbon

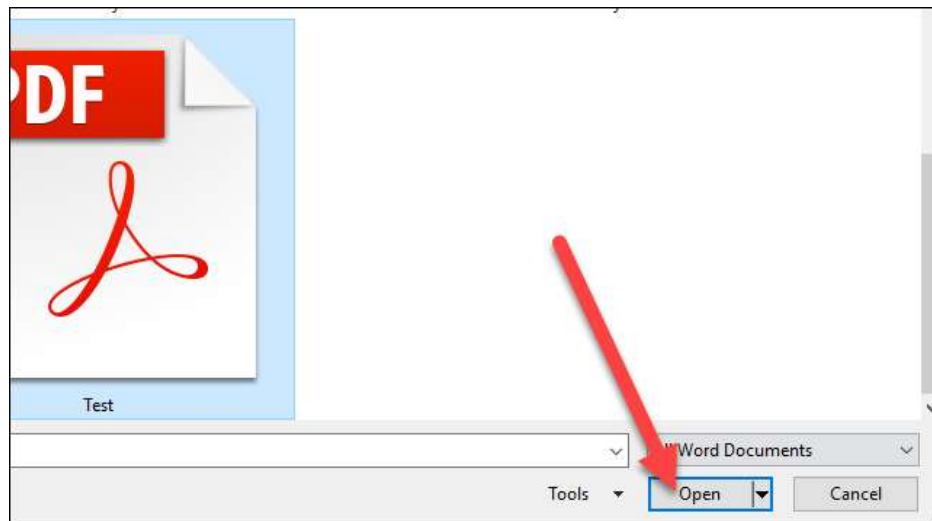

2. In the sidebar that opens, click the "Open" button.

3. On the Open page, browse to wherever your PDF is stored.

4. Locate and select your PDF, and then click the "Open" button.

5. A warning pop ups, indicating that your new document may lose some of the formatting it had as a PDF. Don't worry. Your original PDF will remain intact. Click the "OK" button.

6. Word converts the PDF and opens up your new Word document right away
